CO-LINGO

BMO

CORPORATE LANGUAGE HELPER

Meet your friendly workplace robot that helps simplify corporate jargon, clarify instructions and bring teams closer together.

LESS JARGON. MORE UNDERSTANDING.

HOW BMO HELPS

- ☑ Simplifies confusing jargon
- ☑ Clarifies tasks and instructions
- ☑ Supports inclusive communication
- ☑ Helps teams work better together

TEAM CO-LINGO™

BMO

CORPORATE LANGUAGE HELPER

Meet your friendly workplace robot that helps simplify corporate jargon, clarify instructions and bring teams closer together.

The Social and Mobile Aspects of Our Project

- **Social**: BMO lets people take part in real-time conversations and stay present, without stepping away to work out what was said.
- **Mobile**: It responds to context and location, giving support where it's needed in the workplace.

Evolving the Design Through User Feedback

- **Initial Iteration:** Our first concept was a robot that followed users around the workplace and helped them in conversations whenever they needed it.
- **User Testing and Feedback**: We tested the concept using workplace scenarios. Users told us they wanted their language learning to feel more private.
- **Changes Made**: We made the robot smaller so it is less conspicuous, and removed its wheels. Instead of following users around, it now stays in one place, and they can carry it with them when they need it.

This is what our BMO used to look like!

HOW BMO WORKS

- ☑ Listens in on workplace conversations
- ☑ Detects jargon and unclear instructions
- ☑ Sends simple explanations to your phone privately
- ☑ Sits nearby or travels with you when needed

HOW BMO HELPS

- ☑ Simplifies confusing jargon
- ☑ Clarifies tasks and instructions
- ☑ Supports inclusive communication
- ☑ Helps teams work better together

LESS JARGON. MORE UNDERSTANDING.
